AMENDMENTS

In the Specification

Please replace the paragraph on page 6, lines 19-30 with the following paragraph:

When presented with the need to calculate a product rate, for example a user of computer system 190 has requested a health insurance product rate, rating engine client 110 provides some of the information needed by rating engine server 120 (typically consumer information) to client interface 130 via communication pathway 115. Communication pathway 115 can be a network connection, in the case where product server 100 and rating engine server 120 are, or are executing on, separate computer systems. Alternately, communication pathway 115 can be a message passing scheme,
